How to fix:. itunes 11 for windows 8 pro 32bits. . Hello fellows, I have a problem. I used SP3 patch to fix my wife's pc and I lost all my files. So, I didn't have the time to backup everything. When I installed SP3, only the DVD burning capacity was upgraded. She's using a dell 1520 laptop. I updated Windows to SP3 to fix the issue with the DVD burning capacity. My wife's PC loaded her old profile as default. I then installed a fresh Windows with SP3, then fixed all settings and added some files (I had them all, earlier). I formatted the partition after that. The problem was, I lost all my files. I have windows 8.1 and I used the portable version of itunes and windows in the same USB. I transferred all the files to the pc using itunes. I transferred them to the SD and all. I then installed itunes with the same USB. With itunes, I then deleted everything from the SD. I transferred all the files (only the pictures) again, to the USB. But all my files are gone, even while installing them, it doesn't recognize any of them. How do I restore them? I have the songs, movies, pictures and documents. What should I do? Please help me, I am desperate. In other words, what should I do?
